

Flue gas analyzer

testo 330i

Measurement location-independent operation and Bluetooth measurement value display via Smartphone/tablet and testo 330i App

Non-paper documentation and report creation directly on site with the testo 330i App

Reliable flue gas probe attachment with the testoFix probe mount

Robust, completely sealed plastic housing for use in tough conditions

The testo 330i is the combination of proven technology and revolutionary handling. The basis of the flue gas analyzer is the measurement technology of the proven predecessor testo 330 LL, with these outstanding features:

- Longlife sensors with up to 6 years' lifetime, exchangeable by the user
- TÜV-tested according to 1. BImSchV (VDI 4206) and EN 50379, Parts 1-3
- Integrated gas and draught zeroing without probe removal
- Measuring range extension up to 30,000 ppm CO through automatic fresh air dilution

The operation of the measuring instrument and the display of the measurement values take place by Bluetooth via the testo 330i App on your Smartphone/tablet. This means you always have all relevant values at your fingertips right where you need them. After finishing the measurement, you can insert comments or photos of the plant into your report, and send it to your customer or your office by e-mail. Today's way to measure flue gas.
